

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) A pressurized fluid dispenser device comprising a valve provided with a moving valve member, said valve being mounted on a container containing ~~both the fluid and also a propellant, with or without alcohol,~~ the device having at least one neck gasket between the valve and the container, and a dynamic gasket through which said valve member slides; and, ~~said dispenser device being characterized in that~~

wherein the propellant comprises a hydrofluorocarbon (HFC) gas of the HFC-134a type or of the HFC-227 type; and, ~~and in that~~

at least one of said gaskets comprises ~~one or more of the following elastomer~~
materials:

a) a hydrogenated nitrile butadiene rubber (HNBR);

and

b) a butyl or a halobutyl rubber.

2. (original) A device according to claim 1, in which said gasket comprises an alloy of HNBR and of octene-ethylene copolymer (OEC).

3. (original) A device according to claim 2, in which the gasket comprises about 20% by weight of HNBR and about 80% by weight of OEC.

4. (original) A device according to claim 1, in which said gasket comprises an alloy of HNBR and of butyl or of halobutyl rubber.

5. (original) A device according to claim 4, in which said gasket comprises about 60% by weight of HNBR and about 40% by weight of butyl or of halobutyl rubber.

6. (original) A device according to claim 1, in which said gasket comprises an alloy of HNBR and of ethylene propylene (EP) or of ethylene-propylene-diene-monomer (EPDM).

7. (original) A device according to claim 6, in which said gasket comprises about 50% by weight or less of EP or of EPDM.

8. (original) A device according to claim 1, in which said gasket comprises an alloy of HNBR and of poly-chloroprene rubber (CR).

9. (original) A device according to claim 1, in which said gasket comprises an alloy of HNBR and of styrene butadiene rubber (SBR).

10. (canceled)

11. (new) The device according to claim 1, wherein the propellant includes alcohol.

12. (new) The device according to claim 1, wherein the propellant does not include alcohol.

13. (new) A device according to claim 1, in which said gasket further comprises one or more of the following ingredients: inorganic fillers, carbon black fillers, vulcanization agents, pigments, processing agents, and plasticizers.

14. (new): A device according to claim 1, in which said gasket further comprises one or more other ingredient(s) such as inorganic fillers and/or carbon black fillers and/or vulcanization agents and/or pigments and/or processing agents and/or plasticizers.
